

Task 8.4: ISSUES/CHALLENGES for discussion

JA PreventNCD

- a) **Harmonization of data on claims**: classification systems, data availability, individual/aggregate level, data quality, completeness and coverage;
- b) **Definition and sharing of cost components** and related indicators
- c) **Interoperability** (problems of standardization, lack of common standards) and issues related to data linkage between CRs and other health care data sources
- d) **Data sharing?**: Access (many different authorization procedures, time- and resource- consuming), GDPR local interpretations
- e) **Costs** of monitoring systems in terms of development and maintaining
