6. Bibliografia

Si riportano di seguito le voci bibliografiche suddivise per i tre apparati considerati e per il tema del PPE in generale. E’ aggiunta inoltre una sezione dedicata a tutto il resto della letteratura consultata, ivi compresa quella cosiddetta “grigia”, rappresentata da reports, documenti di agenzie ed istituti, ecc. Si segnalano anche, laddove possibile, i siti dai quali è possibile scaricare gli articoli o i documenti citati.

6.1 Apparato Cardiocircolatorio.

13. The Cardiac Risk in the Young (Screening) Bill
Bill 19 of 2003/4

14. Carek PJ, Mainous A III
The preparticipation physical examination for athletics: a systematic review of current
recommendations
http://bmj.bmjjournals.com/cgi/reprint/327/7418/E170

15. Carek PJ, Futrell M.
Athletes’ view of the preparticipation physical examination. Attitudes toward certain health
screening questions.

Cardiorespiratory fitness in young adulthood and the development of cardiovascular disease risk factors.
JAMA. 2003 Dec 17;290(23):3092-100.

Exercise-related syncope in young competitive athletes without evidence of structural heart
disease. Clinical presentation and long-term outcome.

18. Corrado D, Basso C, Thiene G.
Sudden cardiac death in young people with apparently normal heart.
Cardiovasc Res. 2001 May;50(2):399-408.

19. Corrado D, Basso C, Schiavon M, Thiene G.
Screening for hypertrophic cardiomyopathy in young athletes.

20. Corrado D, Thiene G, Nava A, Rossi L, Pennelli N.
Sudden death in young competitive athletes: clinicopathologic correlations in 22 cases.

Does sports activity enhance the risk of sudden death in adolescents and young adults?

Cardiovascular pre-participation screening of young competitive athletes for prevention of sudden death:
proposal for a common European protocol: Consensus Statement of the Study Group of Sport Cardiology
of the Working Group of Cardiac Rehabilitation and Exercise Physiology and the Working Group
of Myocardial and Pericardial Diseases of the European Society of Cardiology.
Eur Hear J. 2005 Feb 2;23(3):183-91.

23. Deevlin AM, Ostman-Smith I.
Diagnosis of hypertrophic cardiomyopathy and screening for the phenotype suggestive of gene carriage
in familial disease: a simple echocardiographic procedure.

24. Eckart RE, Scoville SL, Campbell CL, Shry EA, Stajduhar KC, Potter RN, Pearse LA, Virmani R.
Sudden death in young adults: a 25-year review of autopsies in military recruits.

25. Fuller CM, McNulty CM, Spring DA, et al.
Prospective screening of 5,615 high school athletes for risk of sudden cardiac death.

26. Fuller CM.

51. Niimura I, Maki T.  
Sudden cardiac death in childhood.  

Screening for hypertrophic cardiomyopathy in a young male military population.  

53. Pelliccia A, Culasso F, Di Paolo FM, Maron BJ.  
Physiologic left ventricular cavity dilatation in elite athletes.  

54. Pelliccia A.  
Determinants of morphologic cardiac adaptation in elite athletes: the role of athletic training and constitutional factors.  

55. Pelliccia A, Maron BJ, Culasso F, Spataro A, Caselli G.  
Athlete's heart in women. Echocardiographic characterization of highly trained elite female athletes.  

56. Pelliccia A, Spataro A, Granata M, Biffi A, Caselli G, Alabiso A.  
Coronary arteries in physiological hypertrophy: echocardiographic evidence of increased proximal size in elite athletes.  

57. Pelliccia A.  
Outer limits of physiologic hypertrophy and relevance to the diagnosis of primary cardiac disease.  

58. Pelliccia A, Di Paolo FM, Maron BJ.  
The athlete's heart: remodeling, electrocardiogram and preparticipation screening.  

59. Pelliccia A, Spataro A, Caselli G, Maron BJ.  
Absence of left ventricular wall thickening in athletes engaged in intense power training  
Am J Cardiol. 1993 Nov 1;72(14):1048-54.

60. Pelliccia A, Spataro A, Maron BJ.  
Prospective echocardiographic screening for coronary artery anomalies in 1,360 elite competitive athletes.  

61. Pelliccia A, Maron BJ, Spataro A, Proschan MA, Spirito P.  
The upper limit of physiologic cardiac hypertrophy in highly trained elite athletes.  

62. Pelliccia A, Maron BJ.  
Outer limits of the athlete's heart, the effect of gender, and relevance to the differential diagnosis with primary cardiac diseases.  

63. Pelliccia A.  
Athlete's Heart and Cardiomyopathy  
1st virtual congress of cardiology  

64. Pelliccia A, Maron BJ, De Luca R, Di Paolo FM, Spataro A, Culasso F.  
Remodeling of left ventricular hypertrophy in elite athletes after long-term deconditioning.  

65. Pelliccia A, Maron BJ.  
Preparticipation cardiovascular evaluation of the competitive athlete: perspectives from the 30-year Italian experience.

6.2 Apparato Respiratorio.

12. Hallstrand TS, Curtis JR, Koepsell TD, Martin DP, Schoene RB, Sullivan SD, Yorioka GN, Aitken ML. Effectiveness of screening examinations to detect unrecognized exercise-induced...
bronchoconstriction.

13. Hammerman SI, Becker JM, Rogers J, Quedenfeld TC, D'Alonzo GE Jr.
Asthma screening of high school athletes: identifying the undiagnosed and poorly controlled.

Effect of continuing or finishing high-level sports on airway inflammation, bronchial hyperresponsiveness, and asthma: a 5-year prospective follow-up study of 42 highly trained swimmers.

15. Helenius II, Tikkanen HO, Haataela T.
Association between type of training and risk of asthma in elite athletes.

16. Holzer K, Brukner P.
Screening of athletes for exercise-induced bronchoconstriction.

Exercise-induced bronchospasm in high school athletes via a free running test: incidence and epidemiology.
Chest. 1998 Dec;114(6):1613-22

Ringraziamenti

La realizzazione del Dossier è stata possibile grazie anche alla collaborazione di numerose persone che hanno contribuito a vario titolo al lavoro. In particolare vogliamo menzionare la sig.ra Rita Maffei dell’ARS Toscana per l’assiduo e prezioso contributo fornito alle lunghe e talvolta difficili ricerche bibliografiche. Prima di partire per una generosa e pluriennale missione in Africa, anche la collega Sarah Bernhardt ha contribuito all’impostazione iniziale del dossier. Il dott. Roberto Pupillo ha contribuito alla ricerca di letteratura scientifica relativa all’apparato muscoloscheletrico. Un sentit o ringraziamento va anche al prof. Domenico Corrado, dell’Università di Padova, per aver partecipato ad un seminario del Gruppo di Progetto, svoltosi a Firenze nell’Ottobre del 2004, cruciale nel chiarire alcuni aspetti essenziali dei temi in discussione.
