99% of the clinical samples processed were confirmed by the National Reference Laboratory at the Istituto Superiore di Sanità

Data available for 52,521 cases

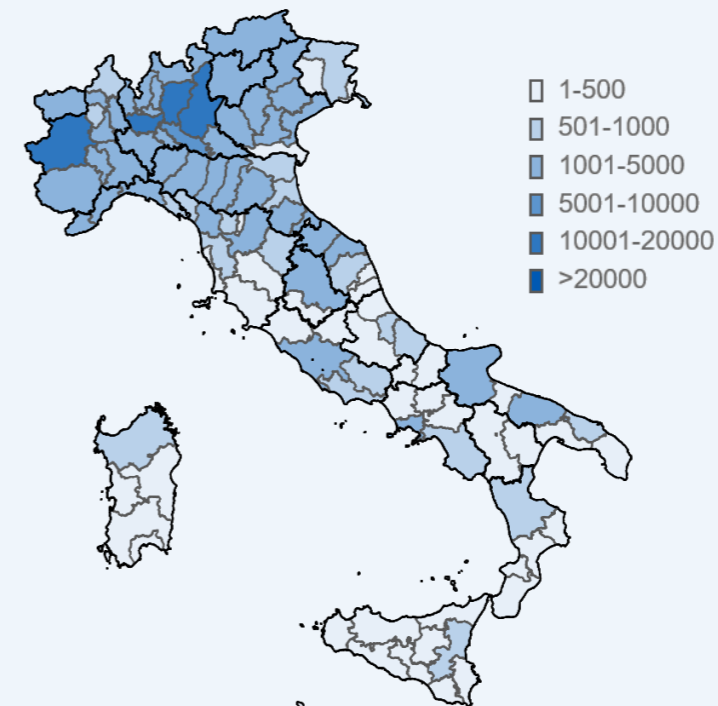

Age (years)	Deaths [n (%)]	CFR [§]
0-9	2 (0%)	0.1%
10-19	0 (0%)	0%
20-29	8 (0%)	0.1%
30-39	49 (0.2%)	0.3%
40-49	223 (0.9%)	0.9%
50-59	903 (3.6%)	2.5%
60-69	2708 (10.9%)	9.8%
70-79	7191 (29%)	24.1%
80-89	10050 (40.6%)	28.9%
>=90	3646 (14.7%)	24.6%
Not reported	0 (0%)	0%
Total	24780 (100%)	12.6%

Total number of COVID-19 cases diagnosed by the Italian Regional Reference Laboratories

By Region/Autonomous Province of diagnosis

(data available for 197,096)

By province of residence

(data available for 192,146)

*The case definition considers as a confirmed case any person with laboratory confirmation of virus causing COVID-19 infection, irrespective of clinical signs and symptoms <https://www.ecdc.europa.eu/en/case-definition-and-european-surveillance-human-infection-novel-coronavirus-2019-ncov>

*ISS collects data on cases that tested positive for SARS-CoV-2 infection diagnosed by all Italian Regions/Autonomous Provinces. Data could differ from aggregated data from the Italian Ministry of Health and the Italian Civil Protection. [§]The term "health-care worker" is based on the occupation and not on the place of exposure. [§]Case Fatality Rate
