Challenges in Partnership Network Building

Lessons from the Field

- Institutional fragmentation and slow processes
- Inequitable engagement and mistrust
- Need for consistent facilitation and stable roles
- Aligning top-down plans with bottom-up needs
- Efforts to balance fidelity to the original intervention with contextual adaptation
- Resource and sustainability issues

Recommendations for Health Promotion Governance

- Design "third spaces" for dialogue, not control
- Stabilize leadership and facilitation roles
- Use community boards for legitimacy and sustainability
- Frame Health4EUKids as a shared platform, not a top-down project

Thank you all for your participation!
